Subject: Application for SAP Analytics Consultant Internship

Dear Hiring Manager,

I am a Bachelor of Science in Information Technology student at STI College Dasmariñas, and I am writing to apply for the SAP Analytics Consultant internship at SAP Philippines Inc. I became interested in this role after completing my SAP S/4HANA certification, where I saw how business data from different departments can be turned into information that helps organizations make better decisions. Interning at SAP would let me learn how analytics solutions are used to solve real business problems.

Through my SAP certification, I worked with the Sales and Distribution, Materials Management, Production Planning, Finance, and Controlling modules using the Global Bike case. This gave me a working understanding of how processes across a company connect, which I believe is important for an analytics consultant. I have also learned SQL, Python, Java, and C# in my studies, and I am comfortable organizing and working with data using Microsoft Excel. These skills give me a base to grow from as I learn SAP's analytics tools.

Consulting also means working with people, and my experience outside the classroom has prepared me for that. As a Service Crew member at Jollibee Imus Aguinaldo for more than a year, I served customers in a fast-paced setting, worked closely with teammates, and earned recognitions such as Most Improved Crew and Service Loyalty Award. As a summer Assistant Nurse at a clinic, I learned to be accurate, observe procedures carefully, and support professionals who depend on reliable work. These experiences taught me to communicate clearly, stay dependable under pressure, and keep learning.

I would be honored to contribute my effort and eagerness to learn to your team at SAP Philippines Inc. Thank you for considering my application. I would welcome the opportunity to discuss how I can support your team, and I can be reached at 0960 544 6060 or danielmatthew820@gmail.com.

Sincerely,

Daniel Matthew R. Desiderio
